An Advanced, Single-use, Arthroscopic Innovation

nuvis®

More than a scope. A category-of-one solution

Single-use nuvis

is a surgical device that addresses the many issues hampering conventional reusable arthroscopes.

► Never Wait.

Convenience

As the ultimate "go to" backup arthroscope, nuvis (nu vee) eliminates the need to find a replacement arthroscope when the first-line arthroscope is un-usable

Efficiency

Nuvis arrives sterile and ready-to-go and can be coupled with any of the leading camera systems

► Never Worry.

Safety

Sterile packaged nuvis, protects patients and institutions from risk of infection or disease transfer due to lapses in processing and sterilization.

Consistency

Nuvis is new every time it is opened, unaffected by the "wear and tear" issues associated with conventional scopes. It delivers predictable clinical performance across all settings, all the time.

Cost Neutral

Get inside the numbers and see how a single-use device like nuvis eliminates the ongoing user costs associated with cleaning, sterilizing, disinfecting, inventory management and instrument repair.

► Never Wonder.

Performance

Innovative engineering delivers 4K image quality and function "on par" with conventional scopes, in a single-use design.

Clarity

By delivering consistent brightness and color inside the surgical target in high definition, nuvis delivers unmatched clarity for the surgeon.

Reliability

State-of-the-art manufacturing processes utilize the same ultra-precise optical visualization technology used in smart phone cameras.

SINGLE-USE

SCOPE

Precision Coolite™ LED

38°C Coolite™

The single embedded LED provides cool, crisp white light without the use of light source or cord, eliminating the potential for "tip burn"

View Angle Innovation

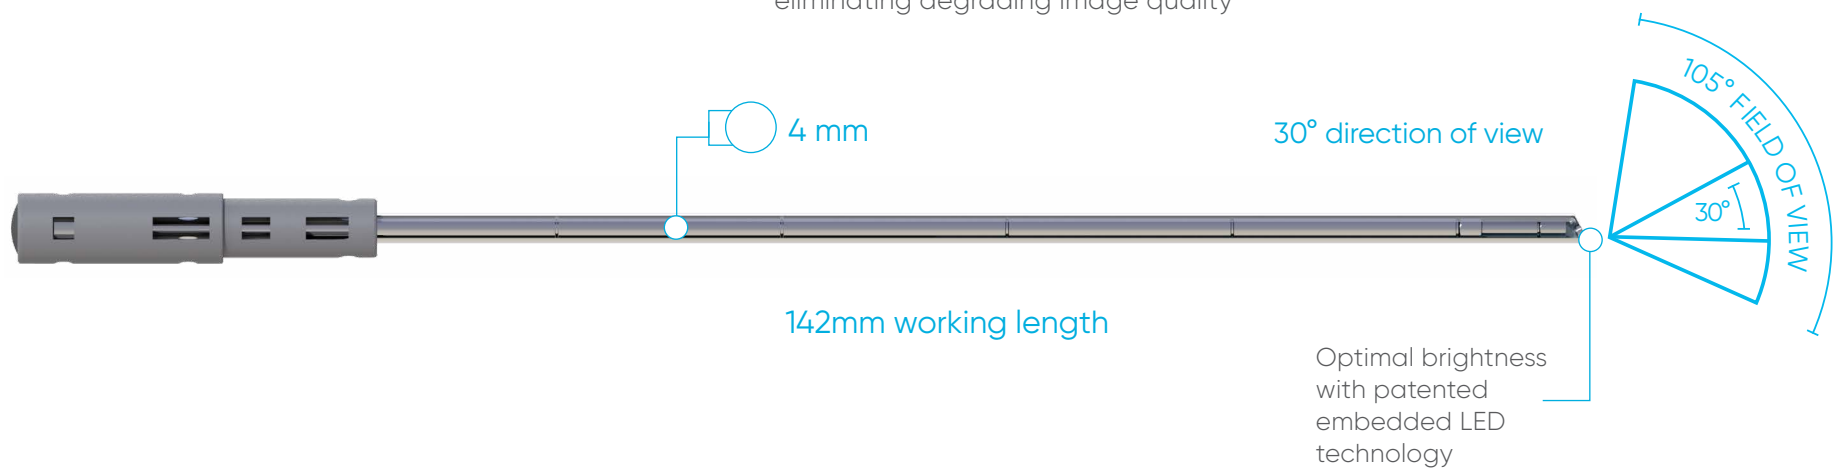

Prism design utilizes high tech materials and components to achieve a variety of viewing angles while minimizing manufacturing costs

4K Quality Imaging

4K

Patented optical design provides 4K image quality without the use of fiber optic bundles and fewer elements, reducing the cost and eliminating degrading image quality

nuvis unmatched feature set

1

Single-Use

- Single-use device with the quality and performance of conventional scopes eliminates the costs associated with processing, sterilization, repairs and downtime

Safety First

- Sterile packaged nuvis, protects patients and institutions from risk of infection due to lapses in processing and sterilization

24 x 7

- As the ultimate "go to" backup arthroscope, nuvis eliminates the need to wait for a replacement arthroscope when the first-line arthroscope is un-usable, eliminating the cost of downtime...permanently

Nuvis is compatible with the locking mechanisms of most cannulas

Lightweight

- ▶ Nuvis design and use of materials reduces weight by 30% compared to conventional scopes for easier maneuverability

No Repairs

- ▶ Nuvis is new every time it is opened, unaffected by the "wear and tear" issues associated with conventional scopes. It delivers predictable clinical performance across all settings, all the time.

4K Performance

- ▶ Innovative engineering delivers 4K image quality and function "on par" with conventional scopes, in a single-use design. State-of-the-art manufacturing processes utilize the same ultra-precise optical visualization technology used in smart phone cameras

Versatility

- ▶ Universal eye-cup design allows nuvis to be used with any camera c-mount coupler system

No Cables

- ▶ With finder tip control, the alkaline battery-driven LED in nuvis eliminates the messy clutter of cables in the OR, avoiding the risk of contamination at the surgical site

Save Big. Free up Resources.

- ▶ Get inside the numbers and see how a single-use device like nuvis eliminates the ongoing user costs associated with cleaning, sterilizing, inventory management downtime and instrument repair

Ordering Information:

Nuvis (STY) IE4030-10

Nuvis (SNN) IE4030SSN-10

Nuvis (ATX) IE4030ATX-10

Indications for Use:

Integrated Endoscopy's nuvis Arthroscope is an endoscopic device introduced into a patient to provide an internal view or image of the interior of a joint for examination, diagnosis, and/or therapy. Integrated Endoscopy's nuvis Arthroscopes are indicated for use in arthroscopic procedures performed in the knee, shoulder, hip, wrist (carpel carpal tunnel syndrome), temporal mandibular joint, ankle, elbow, and feet (plantar fascia release).

Nuvis Benefits and Quick Facts

Sterile packaged, single-use

4K image quality

Works with any camera/C-mount coupler

No light source or cables needed

Coolight™ LED produces minimal heat (38°C)

4.0mm x 142mm, optimal knee/shoulder scope
